

VERSAPPOINT® Communicator

Wireless - How You Communicate

Imagine your desk, your conference table and even your living room completely free from the clutter of cables. VersaPoint Communicator puts the computer at your command without wires and without worries.

Communicator provides the wireless freedom you need. Work collaboratively and pass your keyboard around a conference room with 30' RF range. Switch from writing a presentation to delivering a presentation just by picking up the remote; the single receiver makes it possible. Kick back in the comfort of your office and let your tools come to you; with multi-media and internet keys your computer has never been so accessible.

Plug in the USB receiver, and within seconds you are pointing, typing and presenting. There is no additional software to load. Free up your communication with VersaPoint Communicator.

Features and Benefits

Designed for Input Flexibility

The leader in the innovation of remote controls and wireless tools introduces VersaPoint Communicator. Designed with the mobile professional in mind, the Communicator gives you the freedom to move your tools where you need them. Never has wireless input and presentation control been so complete in a single affordable package.

Range

With RF range of 30 feet, you are free to move about as you type, point or present. Desks, people and walls are no obstacle for VersaPoint Communicator. With RF technology, the 900 MHz signal is omni-directional so a direct line-of-sight is not necessary.

Plug and Play Simplicity

Communicator has no software to load, no complex installation and no compatibility hassles. All you need is a USB port. Plug in the receiver and you are ready to start typing, mousing or presenting.

64 Codes

VersaPoint Communicator has the ability to be programmed to one of 64 different addresses. This allows up to 64 Communicator combos to be used within 30" of the others.

Presentation Remote

Interlink Electronics VersaPoint Communicator Remote is designed to put the power of slide control in the hand of the presenter. Launch your presentation with the single touch of a button. Use the forward icon to advance slides and the reverse icon to go back to the previous slide. The Hide button will give you a blank screen when you need the room to focus on you. The Escape button enables you to end your presentation with grace. Small enough to fit in your pocket, the presentation remote should accompany you to every meeting you attend.

Wireless Keyboard

Conference rooms, living rooms and offices weren't always designed to put keyboards in the most accessible position. Cables never seem long enough and short-range wireless can come up short when you need the maximum flexibility. The full-sized VersaPoint Communicator Keyboard resolves this problem with 30" of RF range. With a complete set of Internet, Multi-media and Command keys, the computer is at your command. Elevation legs help you find the most comfortable angle and the optional palm rest is available to ensure the best of ergonomic positioning.

Optical Mouse

Thoughtfully designed, the Wireless Mouse works well in space-constrained environments and in either hand comfortably. A wheel for scrolling allows for easy navigation and optical sensor frees you from having to clean the mouse of debris.

No Additional Software Required

Since VersaPoint Communicator is fully compatible with Microsoft Windows 98, 98SE, ME, 2000 and XP, there is no additional software to install. Simply plug the receiver into the USB port on your computer. Installation couldn't be easier.

VersaPoint Communicator Remote

The remote control from the VersaPoint Communicator Suite is available for purchase separately.

Communicator Positioning

Professionals - VersaPoint Communicator is designed for today's professionals, who need a complete set of tools and the freedom to move. Communicator provides the ability to type, explore and present at up to 30 feet away. With reliable input, Communicator is the perfect addition to your office, conference room or home office – anyplace than you want to work without the constraints of cables.

Office and IT Managers - For the manager that owns the operation and look of the company conference rooms, VersaPoint Communicator looks great in the corporate environment and makes every meeting more functional. By providing wireless devices for the conferences rooms, you enable the collaboration that is critical for effective meetings. With 30" of range, the keyboard and mouse can be passed around to edit documents and surf the web. Switch from meeting to presentation control, without changing receivers or missing a step. The included remote makes it possible.

Educators - For the professional educator that uses the computer in the classroom, VersaPoint Communicator provides student participation and lecture control. Communicator is simple to operate, easy to handle and provides intuitive controls that help keep the student engaged and part of the learning process.
